Fast Track to Scala

Scala By The Bay Edition!

August 6 & 7 (Before the Conference)

✌ Taught by Brendan McAdams ✌

What is "Fast Track to Scala"

(And why do I want it?)

What is Fast Track to Scala?

→ Typesafe designed course focused on making you a competent Scala developer, with no Scala experience needed

→ Developed (and tweaked) by the Typesafe staff & Scala team — Proven, quality materials

→ 2 days of coursework with a heavy emphasis on *hands on exercises*

What Will I Learn?

→ The Core Skills you need to jump into Scala application development

→ Functional Programming fundamentals

→ Tools such as the SBT build system, and ScalaTest for testing

→ Knowledge and Practical skills: You'll be writing, testing, and interacting with real code throughout the course

Course Topics

→ **Course Topics include (but are not limited to) ...**

  → Object Oriented programming in Scala

  → Testing your Scala code

  → Functional Programming & Collection libraries

  → Pattern Matching

  → Traits & Inheritance

About the Trainer

Brendan McAdams, Scala Developer at Netflix; Former Trainer for Typesafe and MongoDB; Whisky Connoisseur

Experienced Scala Developer, wrote the Scala driver (Casbah, & Hammersmith - an async one) for MongoDB

Early Akka contributor & production user; Speaker at numerous Scala conferences since 2010: Scala Days, Scala Exchange, JavaZone, FlatMap(Oslo) ... and many more
